Health: Wormed. Vaccinated. Negative leukemia. Negative VIF.

Description: Missi is a ball of hair fluffy with a pair of big eyes who fall in love as soon as you know it. We do not know well the details of his earlier life, has not because of having nothing good, despite his Young age: we found it in the Street between cars, with much danger of being hit, and with his eyes bad and full of fungus in his skin.

We took him to the vet and now it is much better, very recovered and happy to be living in a home, without danger of any Kind, quite the contrary, pampered and cared.

Missi is a sweetness of cat, asks mimes as soon as he see you, is cheerful and fun, very good and loving.

Missi needs now a home and a good family that unconditionally to stay by his side forever.

Missi, in his home, lives with dogs, that is wonderful, likes lying with them, at his side.
